Steve,

Do you want metals analysis only to see if the water is meeting likely standards or do you also want the other analyses they will be measuring? Private lab or ESAT?

Speaking of ESAT, I don't think we ever got the results from the June Rico split sampling. Did you get results from Don Goodrich? No rush.

Elliott - thanks for the note and for going ahead with the trip. Please do another flow measurement check for both DR3 and 6.

Also on the next trip let's pull a sample from the vertical flow Bcr and Horizontal wetlands system effluents. Set up analyses accordingly.

Thanks

Hi Steve,

I have successfully mobilized for the Rico site visit. I plan to be on site for the morning safety meeting and visit the site after that. Please let me know if there is anything specific you would like documented. I will call you after my site visit to give and update. I plan to start demobilization after my site visit tomorrow, if you need anything in Silverton I am happy to head over there after Rico. Please feel free to call or email me with any questions or requests.

Thanks,
Elliott
